AGIAKLOGLOU, C. (See NEWBOLD, P.)

AGRESTI, A. and LANG, J. B. A proportional odds model with subject-specific effects for repeated ordered categorical responses 527

AHMAD, I. A. Modification of some goodness-of-fit statistics to yield asymptotically normal null distributions 466

AHN, S. K. Some tests for unit roots in autoregressive-integrated-moving average models with deterministic trends 855

ANDREWS, D. F. (See STAFFORD, J. E.)

ANSLEY, C. F., KOHN, R. and WONG, C.-M. Nonparametric spline regression with prior information 75

BAILEY, R. A. (See MONOD, H.)

BARNDORFF-NIELSEN, O. E. and MCCULLAGH, P. A note on the relation between modified profile likelihood and the Cox–Reid adjusted profile likelihood . 321

BECKER, N. G. and MARSCHNER, I. C. A method for estimating the age-specific relative risk of HIV infection from AIDS incidence data 165

BERAN, J. Fitting long-memory models by generalized linear regression . . 817

CAREY, V., ZEGER, S. L. and DIGGLE, P. Modelling multivariate binary data with alternating logistic regressions 517

CARLIN, B. P. and GELFAND, A. E. Parametric likelihood inference for record breaking problems 507

CARRIERE, K. C. and REINSEL, G. C. Optimal two-period repeated measurement designs with two or more treatments 924

CARROLL, R. J. (See WANG, C. Y.)

CHAN, Y. M. and HE, X. On median-type estimators of direction for the von Mises–Fisher distribution 869

CHAO, A., MA, M.-C. and YANG, M. C. K. Stopping rules and estimation for recapture debugging with unequal failure rates 193

CHEN, J. and QIN, J. Empirical likelihood estimation for finite populations and the effective usage of auxiliary information 107

COOK, R. D. (See ST. LAURENT, R. T.)

COX, D. R. Unbiased estimating equations derived from statistics that are functions of a parameter 905

DAVIDIAN, M. and GALLANT, A. R. The nonlinear mixed effects model with a smooth random effects density 475

DAWID, A. P. Editorial 1

DESHPANDE, J. V., DHARMADHIKARI, A. D. and NAIK-NIMBALKAR, U. V. Two-sample tests based on cumulative incidence functions from coherent systems . 877

DEY, D. K. (See MUKERJEE, R.)

DHARMADHIKARI, A. D. (See DESHPANDE, J. V.)

DICICCIO, T. J., MARTIN, M. A. and YOUNG, G. A. Analytical approximations to conditional distribution functions 781

DiCiccio, T. J. and Stern, S. E. On Bartlett adjustments for approximate Bayesian inference 731
Diggle, P. (See Carey, V.)
Drescher, K. (See Schill, W.)
Duan, N. Sensitivity analysis for Box–Cox power transformation model: Contrast parameters 885
Efron, B. Bayes and likelihood calculations from confidence intervals . . 3
Eubank, R. L. and Hart, J. D. Commonality of cusum, von Neumann and smoothing-based goodness-of-fit tests 89
Farrow, M. and Goldstein, M. Bayes linear methods for grouped multivariate repeated measurement studies with application to crossover trials . . 39
Firth, D. Bias reduction of maximum likelihood estimates 27
Fitzmaurice, G. M. and Laird, N. M. A likelihood-based method for analysing longitudinal binary responses 141
Fleming, T. R. (See Kosorok, M. R.)
Fuller, W. A. (See Pantula, S. G.)
Gallant, A. R. (See Davidian, M.)
Gasser, T. (See Seifert, B.)
Gelfand, A. E. (See Carlin, B. P.)
Godambe, V. P. and Kunte, S. Optimal estimation under biased allocation of treatments 797
Goldstein, M. (See Farrow, M.)
Guttman, I. (See Peña, D.)
Ha, E. and Newton, H. J. The bias of estimators of causal spatial autoregressive processes 242
Hall, P. and Wood, A. On the performance of box-counting estimators of fractal dimension 246
Hart, J. D. (See Eubank, R. L.)
He, X. (See Chan, Y. M.)
Heyde, C. C. and Morton, R. On constrained quasi-likelihood estimation . 755
Hills, S. E. and Smith, A. F. M. Diagnostic plots for improved parameterization in Bayesian inference 61
Holder, D. J. and Hsuan, F. Moment-based criteria for determining bioequivalence 835
Hsuan, F. (See Holder, D. J.)
Ii, Y. (See Raghunathan, T. E.)
Jewell, N. P. and Nielsen, J. P. A framework for consistent prediction rules based on markers 153
Jewell, N. P. (See Neuhaus, J. M.) 253
Jöckel, K.-H. (See Schill, W.)
Johnson, R. A. (See Omori, Y.)
Jorgensen, M. A. Influence functions for iteratively defined statistics . .
Kleffe, J. Parent-offspring and sibling correlation estimation based on MINQUE theory 393
Kohn, R. (See Ansley, C. F.)
Komaki, F. State-space modelling of time series sampled from continuous processes with pulses 417
Koopman, S. J. Disturbance smoother for state space models 117

KORN, E. L. On estimating the distribution function for quality of life in cancer clinical trials 535
KOSOROK, M. R. and FLEMING, T. R. Using surrogate failure time data to increase cost effectiveness in clinical trials 823
KUK, A. Y. C. A kernel method for estimating finite population distribution functions using auxiliary information 385
KUMAZAWA, Y. Comments on 'A new test for mean residual life times' by Ahmad. 473
KUNTE, S. (See GODAMBE, V. P.)
LAIRD, N. M. (See FITZMAURICE, G. M.)
LANG, J. B. (See AGRESTI, A.)
LAUD, P. W. (See RAMGOPAL, P.)
LEE, C.-I. C., ROBERTSON, T. and WRIGHT, F. T. Bounds on distributions arising in order restricted inferences with restricted weights 405
LI, B. A deviance function for the quasi-likelihood method 741
LIN, D. Y., WEI, L. J. and YING, Z. Checking the Cox model with cumulative sums of martingale-based residuals 557
LIN, D. Y. and YING, Z. A simple nonparametric estimator of the bivariate survival function under univariate censoring 573
LISEO, B. Elimination of nuisance parameters with reference priors 295
LIU, Q. and PIERCE, D. A. Heterogeneity in Mantel–Haenszel-type models . 543
MA, M.-C. (See CHAO, A.)
MARSCHNER, I. C. (See BECKER, N. G.)
MARTIN, M. A. (See DICICCIO, T. J.)
MCCULLAGH, P. (See BARNDORFF-NIELSEN, O. E.)
MCDOUGALL, A. J. (See STOFFER, D. S.)
MENG, X.-L. and RUBIN, D. B. Maximum likelihood estimation via the ECM algorithm: A general framework 267
MITCHELL, H. Testing for linearity versus convexity in regression using a contrast-type test 695
MONOD, H. and BAILEY, R. A. Two-factor designs balanced for the neighbour effect of one factor 643
MONTI, A. C. and RONCHETTI, E. On the relationship between empirical likelihood and empirical saddlepoint approximation for multivariate *M*-estimators . 329
MOREL, J. G. and NAGARAJ, N. K. A finite mixture distribution for modelling multinomial extra variation 363
MORTON, R. Ultrastructural relationships and canonical variates analysis . . 915
MORTON, R. (See HEYDE, C. C.)
MUKERJEE, R. and DEY, D. K. Frequentist validity of posterior quantiles in the presence of a nuisance parameter: Higher order asymptotics 499
MURDOCH, D. J. (See SMALL, C. G.)
NAGARAJ, N. K. (See MOREL, J. G.)
NAIK-NIMBALKAR, U. V. (See DESHPANDE, J. V.)
NAM, J.-M. Bias-corrected maximum likelihood estimator of a log common odds ratio 688
NEUHAUS, J. M. and JEWELL, N. P. A geometric approach to assess bias due to omitted covariates in generalized linear models 807
NEWBOLD, P. and AGIAKLOGLOU, C. Bias in the sample autocorrelations of fractional noise 698
NEWTON, H. J. (See HA, E.)

NIELSEN, J. P. (See JEWELL, N. P.)
ODAKI, M. On the invertibility of fractionally differenced ARIMA processes . 703
OMORI, Y. and JOHNSON, R. A. The influence of random effects on the unconditional hazard rate and survival functions 910
OSIEWALSKI, J. and STEEL, M. F. J. Robust Bayesian inference in l_q-spherical models 456
PANKRATZ, A. Detecting and treating outliers in dynamic regression models . 847
PANTULA, S. G. and FULLER, W. A. The large sample distribution of the roots of the second order autoregressive polynomial 919
PEÑA, D. and GUTTMAN, I. Comparing probabilistic methods for outlier detection in linear models 603
PIERCE, D. A. (See LIU, Q.)
QIN, J. (See CHEN, J.)
RABINOWITZ, D. Estimating Durbin's approximation 671
RABINOWITZ, D. and RYAN, L. Lower confidence bounds for time to cure . . 681
RAGHUNATHAN, T. E. and II, Y. Analysis of binary data from a multicentre clinical trial 127
RAMGOPAL, P., LAUD, P. W. and SMITH, A. F. M. Nonparametric Bayesian bioassay with prior constraints on the shape of the potency curve 489
REEVES, G. K. Goodness-of-fit tests in two-state processes 431
REINSEL, G. C. (See CARRIERE, K. C.)
ROBERTSON, T. (See LEE, C.-I. C.)
RONCHETTI, E. (See MONTI, A. C.)
RUBIN, D. B. (See MENG, X.-L.)
RYAN, L. (See RABINOWITZ, D.)
SCHAFER, D. W. Likelihood analysis for probit regression with measurement errors 899
